

## Nutrient Network Technician

*"Potties with Purpose"*

**Full time** | 30+ hours/week

### About Wasted\* PBC

Wasted\* provides Potties with Purpose – we bring sustainability to sanitation and demonstrate that human waste is a valuable resource. We offer urine-diverting and traditional portable restrooms, and at our headquarter's \*Lab, we recover and reintroduce a portion of the water and nutrients (nitrogen, phosphorus, and potassium) from human waste.

### Primary Purpose

The Nutrient Network Technician is responsible for supporting the entire nutrient recovery process. This includes driving, collection in the field, offloading at the \*Hub (company headquarters), and reintroduction of urine-derived fertilizer streams at local farms. Their main responsibilities are to deliver excellent customer satisfaction by driving the company service truck to various locations in beautiful Northern Vermont, servicing, pumping, cleaning, and repairing portable restrooms, applying urine-derived fertilizer to farms, and contributing to the optimization of servicing systems for our portable sanitation offering. They will also provide in-person, hands-on support around our headquarters by completing tasks that enable the deployment of portable units into the market, such as repairing units, maintaining vehicles, washing vehicles, and restocking supplies.

This position is crucial to our mission and represents the face of our circular sanitation company.

### Responsibilities

- Operate a company service truck and drive to various locations to service, pump, and refresh portable restrooms or deliver units for our clients in accordance with Wasted and DOT requirements. Pump the mixed waste stream and/or urine stream into the appropriate truck tank.
- Provide outstanding customer service when on customer worksites to ensure services are completed to their satisfaction.
- Ensure proper unloading of waste streams. Depending on the delivery and service type, empty the truck at the Wasted\*Hub and/or local wastewater treatment plants.
- Use a tablet with route and service software to efficiently complete jobs; complete required route paperwork.
- Check, wash, and repair units and vehicles as needed.

**\*On purpose.**

- Demonstrate professional behavior, an accountable work ethic, and adapt to a flexible schedule. Perform all work duties in a safe manner in accordance with Wasted\* and DOT safety standards to prevent accidents or injuries.

### **Qualifications and skills**

- Team player with a "can-do" attitude.
- Strong verbal communication skills.
- Maintains a calm and level-headed demeanor under pressure and in challenging or stressful situations.
- Strong decision-making, problem-solving, and time management skills.
- Excellent attention to detail.
- Able to walk up to 30 minutes at a time without exertion and lift 30 lbs from floor to head.
- Valid driver's license (CDL or non-commercial).

### **Compensation**

- \$30 per hour
- Generous healthcare benefits, including vision and dental.
- Generous time off, including paid time off and community service time.

### **Company Values**

- Biophilia: We hold a sacred celebration of the natural world and recognize Earth as our primary stakeholder. With a profound sense of interconnection, we consider all life in everything we do.
- Reverence: We have deep respect for all those that make our work possible: service technicians and customers, those who came before us and those who work alongside us. We hold ourselves and each other in high regard, prioritizing honest and integrity driven collaboration. We recognize that each of our individual actions – and how we do them – matters.
- Fun: In our approach to life and work, we maintain a perspective of levity and positivity. We embrace the notion that fun is not merely an outcome, but a lens through which we view the world. We take responsibility for consciously infusing fun into our professional endeavors.
